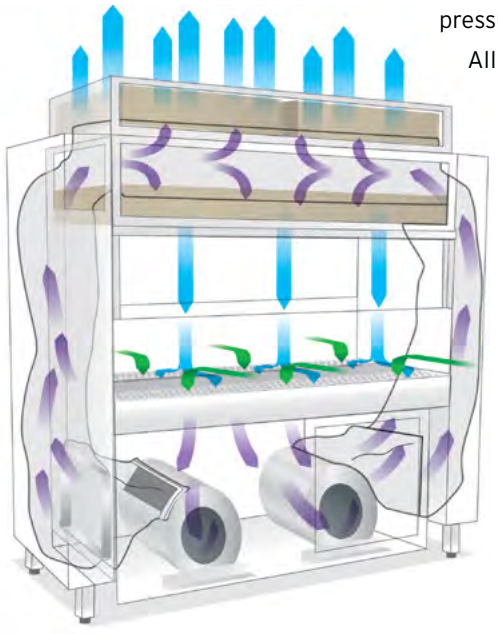
LABGARD NU-610

Class II Type A2 Wall Pass-Through

The LabGard® ES (Energy Saver) NU-610 Class II, Type A2 Dual Access Laminar Airflow Biosafety Cabinet is built directly into the wall of your laboratory, which makes it easy to transfer new animals into a facility or move them between different rooms. NuAire builds each NU-610 model to fit your lab's specific needs. The NU-610 uses a Minihelic™ pressure gauge to constantly monitor and display airflow pressure within the HEPEX plenum. All sizing, features, and options can be fully customized to fit your lab's specific needs. The NU-610 meets the standards of a Class II Type A2 BSC, but this model is fully capable of exhausting directly through your lab's HVAC network.



- HEPA Filtered Air
- Contaminated Work Zone Air
- Contaminated Room Air
